# Injeção de Água quente

Relembrando as equações:

$$\frac{\partial S_1}{\partial t} + \frac{u_t}{\phi} \frac{\partial f_1(S_1, T)}{\partial x} = 0 \tag{1}$$

$$[\phi(M_{t_1}S_1 + M_{t_2}S_2) + (1 - \phi)M_{t_s}]\frac{\partial T}{\partial t} + [u_t(M_{t_1}f_1 + M_{t_2}f_2)]\frac{\partial T}{\partial x} = 0$$
 (2)

Pela Regra da Cadeia, a Equação 1 pode ser reescrita como:

$$\frac{\partial S_1}{\partial t} + \frac{u_t}{\phi} \left[ \frac{\partial f_1}{\partial S_1} \frac{\partial S_1}{\partial x} + \frac{\partial f_1}{\partial T} \frac{\partial T}{\partial x} \right] = 0$$
 (3)

As Equações 2 e 3 podem ser representadas na forma matricial:

$$\begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix} \begin{bmatrix} \frac{\partial S_1}{\partial t} \\ \frac{\partial T}{\partial t} \end{bmatrix} + \begin{bmatrix} \frac{u_t}{\phi} \frac{\partial f_1}{\partial S_1} & \frac{u_t}{\phi} \frac{\partial f_1}{\partial T} \\ 0 & \frac{u_t}{\phi} \frac{\left(M_{t_1} f_1 + M_{t_2} f_2\right)}{\left[\left(M_{t_1} S_1 + M_{t_2} S_2\right) + \frac{(1 - \phi)}{\phi} M_{t_s}\right]} \end{bmatrix} \begin{bmatrix} \frac{\partial S_1}{\partial x} \\ \frac{\partial T}{\partial x} \end{bmatrix} = \begin{bmatrix} 0 \\ 0 \end{bmatrix}$$
 (4)

## Autovalores ( velocidades características ):

A partir da correlação de autovalores e autovetores:  $(A-\lambda I)\overrightarrow{r}=0$  :

$$\begin{bmatrix} \frac{u_t}{\phi} \frac{\partial f_1}{\partial S_1} & \frac{u_t}{\phi} \frac{\partial f_1}{\partial T} \\ 0 & \frac{u_t}{\phi} \frac{\left(M_{t_1} f_1 + M_{t_2} f_2\right)}{\left[\left(M_{t_1} S_1 + M_{t_2} S_2\right) + \frac{\left(1 - \phi\right)}{\phi} M_{t_s}\right]} \end{bmatrix} - \begin{bmatrix} \lambda & 0 \\ 0 & \lambda \end{bmatrix} = \begin{bmatrix} 0 \\ 0 \end{bmatrix}$$

$$(5)$$

$$\begin{bmatrix} \frac{u_t}{\phi} \frac{\partial f_1}{\partial S_1} - \lambda & \frac{u_t}{\phi} \frac{\partial f_1}{\partial T} \\ 0 & \frac{u_t}{\phi} \frac{\left(M_{t_1} f_1 + M_{t_2} f_2\right)}{\left[\left(M_{t_1} S_1 + M_{t_2} S_2\right) + \frac{(1 - \phi)}{\phi} M_{t_s}\right]} - \lambda \end{bmatrix} = \begin{bmatrix} 0 \\ 0 \end{bmatrix}$$

$$(6)$$

Como:

$$det(A - \lambda I) = 0 \tag{7}$$

então:

$$\left(\frac{u_t}{\phi} \frac{\partial f_1}{\partial S_1} - \lambda\right) \left(\frac{u_t}{\phi} \frac{(M_{t_1} f_1 + M_{t_2} f_2)}{\left[(M_{t_1} S_1 + M_{t_2} S_2) + \frac{(1-\phi)}{\phi} M_{t_s}\right]} - \lambda\right) = 0$$
(8)

Assim, os dois autovalores( $\lambda_1 e \lambda_2$ ) serão:

$$\lambda_1 = \frac{u_t}{\phi} \frac{\partial f_1}{\partial S_1} \tag{9}$$

$$\lambda_2 = \frac{u_t}{\phi} \frac{(M_{t_1} f_1 + M_{t_2} f_2)}{\left[ (M_{t_1} S_1 + M_{t_2} S_2) + \frac{(1-\phi)}{\phi} M_{t_s} \right]}$$
(10)

(12)

$$\overrightarrow{r_1} = \begin{bmatrix} r_1^{(1)} \\ r_1^{(2)} \end{bmatrix} = \begin{bmatrix} 1 \\ 0 \end{bmatrix} \tag{13}$$
